Creating Smarter Business

AiR SHUTTERS

We live in a modern world where time is more precious than ever but we are still stuck doing errands that demand our precious time we're never getting back. Even a simple one-minute chore, like shutting windows or opening window blinds adds up to over 20 days in an average person's life. Fortunately, smart appliances can take over these time-consuming tasks. We will share with you how smart roller shutters as shopfront closures can give you that one extra minute each day along with convenience and comfort.

For all smart devices, the main and most obvious feature is that you can control your device anytime from anywhere. Smart roller shutters as shopfront closure gives you the convenience of controlling them directly from your smartphone. You can decide when to open or close the shutters without having to go there physically. Control also means you can check on them at anytime anywhere and control them as you please.

Let's see how making your roller shutters as shopfront closures smarter can improve your life and your business.

### 3 Benefits of smart roller shutters

Opening your roller shutters may not be the most tedious and exhausting errand, but it still is an errand. Each time when your manager is late or on medical leave, you have to go down to your shop or office to open the door. Smart roller shutters will take care of that for you. This save you more time for you and your family.

## 1. Smart roller shutters simplify your life

Even if that extra minute per day doesn't quite convince you, there are still many reasons to upgrade your roller shutters. Making them smart means that they're operated by a motor which is hooked to a controller which communicates with your smartphone. This allows you to operate your roller shutter remotely without any strain right from the comfort of your home. Even if you are travelling in another country, you can still access your smart roller shutters. You can also close the shutter if your employees have accidentally left open.

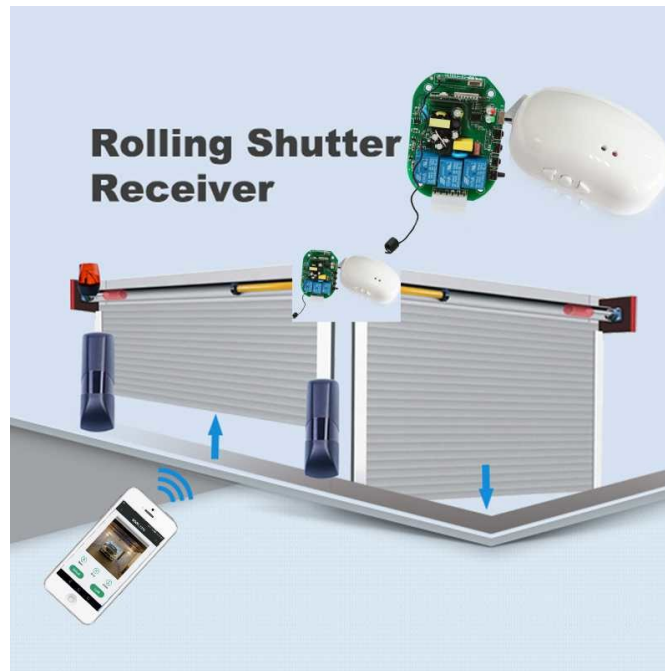

But wait, there's more. Smart roller shutters can also be programmed to work on their own - they can follow predefined rules or be paired with other smart devices and act according to their input or output. They can be automated to open and close when they're supposed to. Relieving you not only from having to operate them but also from having to think about them.

## **2. Add extra security and protection to your business**

Leaving your office and realized you forgot to close your shutters or even windows, can be pretty frightening. By turning your roller shutters smarter, you never have to worry about this again. This way you can close it remotely or have them do that automatically. Thus preventing any potential damage to your property.

Smart roller shutters as shopfront closure can also help to keep your business safer from intruders and intervene in case of a break-in. In such case, you will get real time notification when the roller shutter is open, alerting you to check and call the authorities in time. To relieve you from unnecessary stress while on vacation, smart roller shutter can discourage any potential burglars from acting. This gives you extra sense of security and letting you sleep even tighter.

If a mishap of a fire breakout, you can open the smart roller shutters remotely to expose every possible escape route.

### 3. Smart technology saves you money

Apart from making your business smarter. You can simply give access to the managers or trusted employees to operate the smart roller shutters without duplicating multiple keys. You do not need to change the locks when the employee leaves the organisation. Smart roller shutters can help to reduce your business cost such as

- Save manpower cost
- Lower operating cost
- Lower maintenance cost

## Easy to integrate

Much like other smart devices, smart roller shutters can be easily integrated into your smart home and taught to work together with other devices. There are many different apps on the market that are compatible with any motorized roller shutters. And this technology isn't limited to only shutters. You can automate your office lights, blinds and CCTV. Pretty much anything to create smarter business.

## Be part of the future

There is one more reason why you will love smart roller shutters. Like most smart devices we are using today, they are simply a great gadget to have. Smart roller shutters are definitely a part of the tomorrow that is already right here for you.

To conclude, smart roller shutters are new and exciting additions to any business. Whether you're a tech person or just someone who needs an extra minute of free time per day, these devices will save you time, money and simply make your business smarter. Now that sounds like a sound investment!
